

BioProtect

Protecting and Restoring Ecosystems and Biodiversity

Advancing area-based management tools to accelerate the protection and restoration of marine biodiversity

EU Programme: HORIZON-MISS-2023-OCEAN-01-03

18 project partners

Coordinator: MATIS

8 countries

Budget: 8.023.357.50€

Duration: May 2024-April 2028

Type of action: HORIZON-IA

What will BioProtect do?

- Co-develop and demonstrate transferable ecosystem-based solutions to accelerate the effective protection and restoration of biodiversity in marine and coastal ecosystems.

How will BioProtect do this?

- Develop & promote the use of an Area-Based Management Decision Support Framework (ABM-DSF) to support Ecosystem-Based Marine Spatial Planning (EB-MSP).
- Reduce multiple interacting pressures from human activities on the marine biodiversity of the Atlantic and Arctic ocean.

What will BioProtect achieve?

- Deliver strategic innovations and methodologies to protect and restore marine biodiversity.
- Prioritize marine areas for protection.
- Engage stakeholders in decision-making process.
- Empower citizens to contribute to marine conservation efforts.

Key Project Innovations

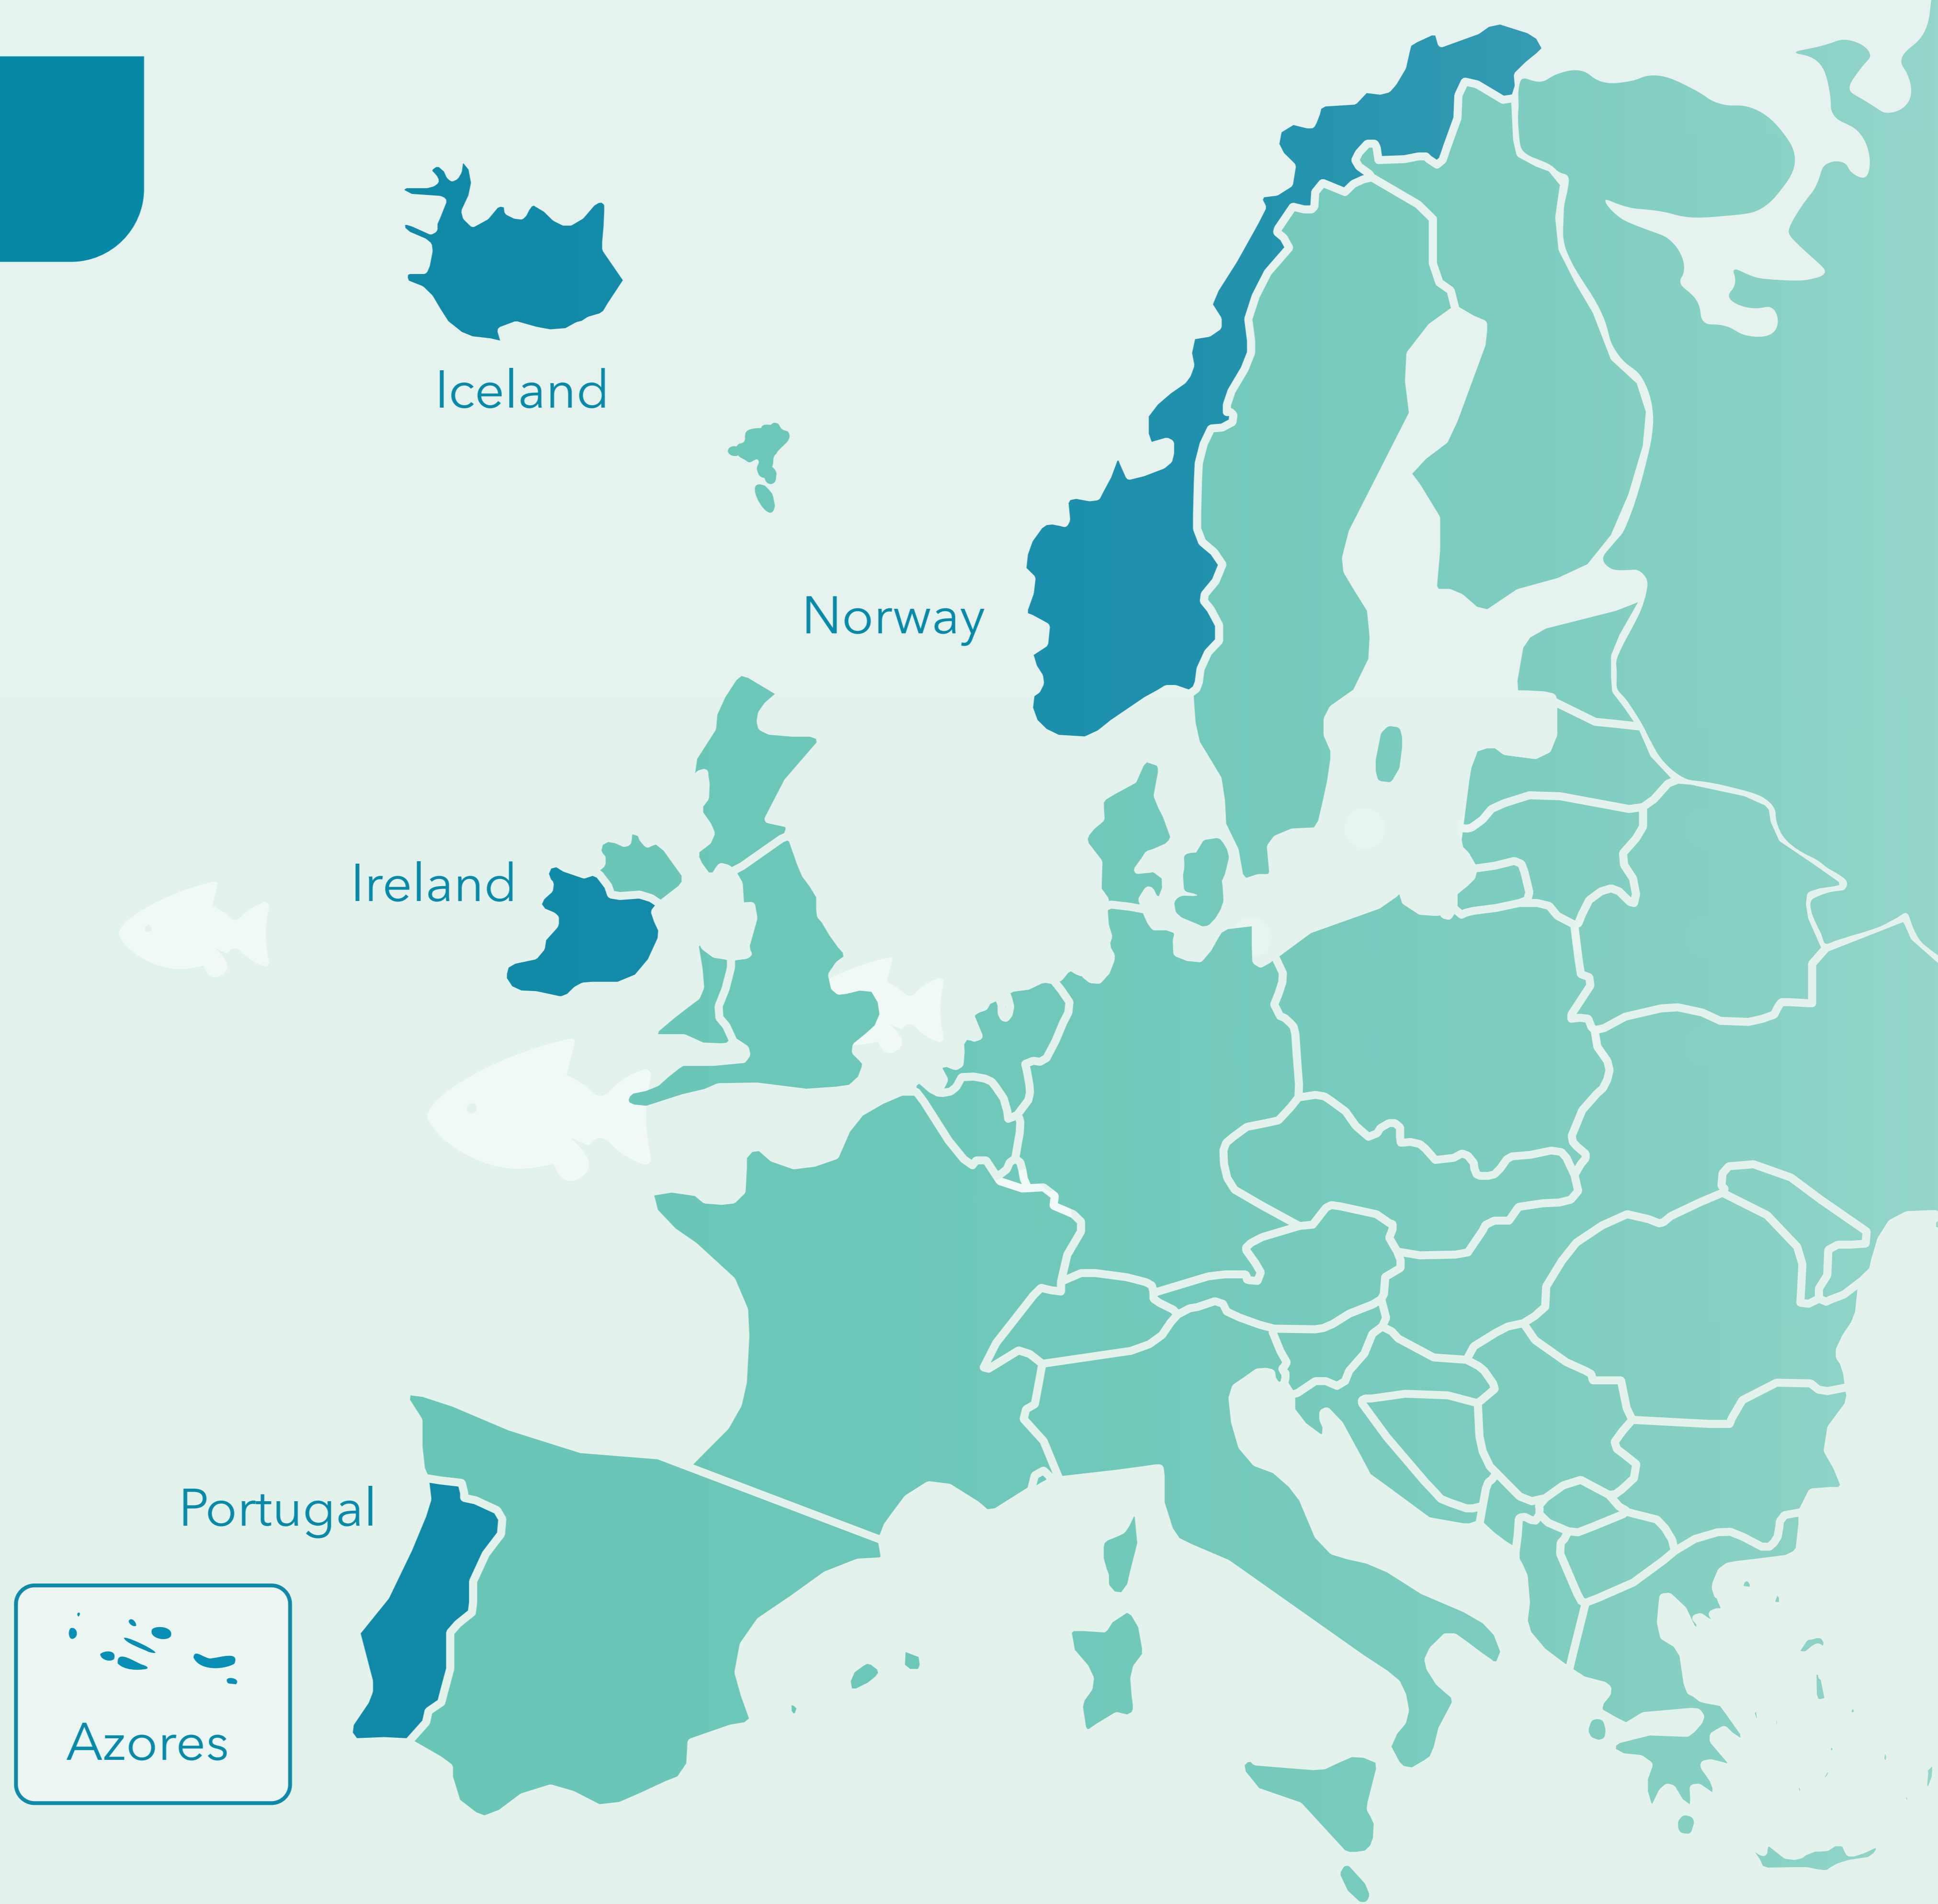

Area-based management solutions

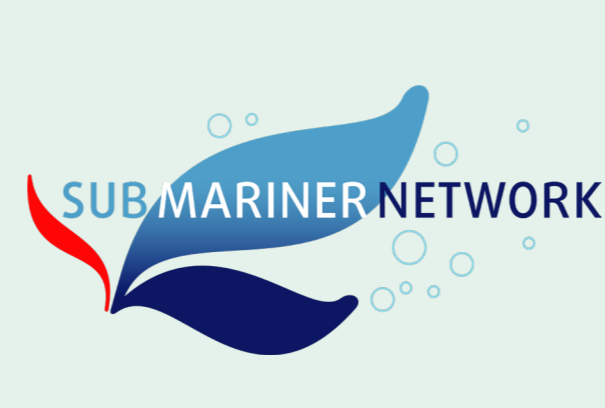

Five demonstration sites

Strong public participation
